Creating and Editing Aura Components

OK! Time to write some code! #finally!

The first step to writing Aura component code is, uh, getting set up to write code. Fortunately, this is really easy. In your org, open the Developer Console under *Your Name* or the quick access menu (⚙️).

Lightning Experience

Salesforce Classic

Time Estimate

🕒 About 25 mins

Topics

Learning Objectives

[Creating and Editing Aura Components](#)

Create Aura Components in the Developer Console

What Is a Component?

What Is an App?

What Are Apps For?

Components Containing Components, Containing... Components!

Resources

Report – Report can be typed or hand written for up to two pages.

TOPICS LEARNT

- Create a required custom objects
- Configure your org for lightning components development
- Describe what the lightning components framework is and what it's used for
- Able to list four key difference between lightning components & other web app frameworks
