18/06/2020.

Basic Concept of C.

- Introduction to c
- Datatype. [int, float, double, char]
- Input output function
    - get char()
    - Putchar()

- Arithmatic Operation.
    - Addition Substraction multiplication division, modulus division

- Condition loop,
            if, else, Switch

- Function
    - library function
      user defined function

- Arrays

- Pointers

- String

- Function Pointer.
